		24 Tt Bottlenose dolphin	76	0

The focus of the survey is Gray whales (northbound) during migration. We recorded sighting data for all cetaceans, including a distinguishing tally of Gray whales (southbound), as well as observations of Sea otters, Harbor seals, and rare pinnipeds. We usually only enter sightings of California Sea lions onshore, in need of a rescue. On such occurrences, we also notify Santa Barbara Marine Mammal Center.

Note: Of the species sighted, only Gray whales (north and southbound) were migrating past the Point. Their tallies indicate the number of unique animals observed through the survey. All other cetaceans, pinnipeds, and Sea otters were sometimes sighted multiple times during a day and likely seen over and over on different days as the survey progressed. The tallies of these species represent the number of animals (not necessarily unique) documented throughout the survey.
